Abstract (en)

[origin: EP0341642A2] The apparatus for splicing webs, particularly paper webs (13, 28), for the production of corrugated cardboard has a first cylinder (14) for guiding and clamping a first web (13) coming to an end, a second cylinder (25, 39) for guiding and clamping a beginning second web (28), and a blade carrier (35) with blades (45, 46), the beginning of the second web (28) being connected to the first web (13) and the first web (13) then being cut off. In this case, the first cylinder (14, 22) for clamping the web (13) coming to an end is arranged upstream from a clamping device (50, 51, 35), and there is a blade (45, 46) cutting into the gore (47) of the two cylinders (14, 22, 25, 39) pressed against each other.
