Abstract (en)
[origin: EP0341682A2] The invention relates to a ribbed plate (1) with an abutment for mounting guard rails in the region of points for rail vehicles, having a base plate (2) which has fixing ribs (4) on its top side (3) and which has a support surface (6) situated opposite the top side (3); and having a pedestal (7) which extends essentially perpendicularly to the base plate (2) and is joined to the base plate (2). The ribbed plate is characterised in that the fixing ribs (4) are formed as a single piece with the base plate (2) in one production operation, and in that the fixing ribs (4) each have a recess (11) which opens in the direction of the supporting surface (6). <IMAGE>
