Abstract (en)

[origin: EP0342088A1] The present invention relates to a packaging device, made from thin sheet such as cardboard, for a plurality of objects. According to the invention, the packaging device (1) is notable in that it comprises a plurality of individual, juxtaposed receptacles (2), and a common covering (3) connected individually to each of the said receptacles (2) and which can be divided into a plurality of covering elements (4), each of which corresponds to one of the said receptacles (2). The invention applies to the packaging of a plurality of objects. <IMAGE>
