Abstract (en)

[origin: JPH01314783A] PURPOSE: To obtain the subject textile drawing aids that can render polyester- containing fiber materials the antistatic properties, smoothness and/or flexibility by using a mixture of a specific oxidized polyethylene and a specific quaternary ammonium phosphate. CONSTITUTION: (A) An oxidized polyethylene with an average molecular weight of 3,000-8,000, the acid value of 25-60, the saponification value of 40-80 and a density of 0.94-1.09 g/cm³ and (B) a phosphate selected from quaternary ammonium phosphates of formula I [R<1> is a straight or branched chain 6-22C alkyl, formula II; R<2> and R<3> are each (AO)1-5 -H, methyl or the like or R<2> and R<3> are incorporated to form formula III; R<4> is a straight or branched chain 5-21C alkyl; R is same as cited above, a 6-22C alkyl; A is a 2-4C alkylene; P is 2 or 3; n is 1 or 2; m is 2 or 1] and quaternary ammonium phosphate of formula IV (R<5> is a straight or branched chain 5-21C alkyl; R<6> is OH or the like; R is same as cited above, a 6-22C alkyl; A, m, and n are each same as cited above) are emulsified in water and the emulsion is applied to polyester fiber products.

Abstract (de)

Mischungen, die anoxidierte Polyethylene und ausgewählte quartäre Ammoniumphosphate enthalten, werden als ziehfähige Textilhilfsmittel zum Antistatisch-, Glatt und/oder Weichmachen polyesterhaltiger Fasermaterialien verwendet.
