Abstract (en)
[origin: EP0342481A2] The invention relates to an indicator for the recovery of skiers buried by an avalanche, with the aid of a search and rescue system which works with transmitters and receivers; in order to guarantee quick recovery with great certainty and to offer every skier in a simple manner the possibility of making use of the advantages of a search and rescue system, it is proposed that the indicator located on the skier forms a unit with a ski pass.
