Abstract (en)
[origin: EP0342997A2] A general purpose cleaning composition comprises 0.01 to 90% by weight of a nonionic surfactant, 0.005 to 50% by weight of a cationic surfactant which has a sanitising action, and 0.003 to 20% by weight of a non-anionic polymer which has an adsorptive affinity to hard surfaces. The inclusion of the non-anionic polymer in general-purpose cleaners containing a nonionic and a cationic detergent provides a significant streak free benefit in the cleaned surfaces.
