Abstract (en)
[origin: EP0343011A2] A window structure comprises a frame (110) having upper and lower frame portions (110a, 110c) spaced by opposed side portions and defining an opening for receiving a window pane. The frame is at least partially secured to a building by mortar (24). In order to provide ventilation through the window structure at least part of the mortar either above and/or below and/or to the sides of the frame is replaced with a ventilator (101, 106).
