Abstract (en)
The invention relates to a cardboard container intended to be used in a compacter, for example for domestic refuse. <??>The container body is formed from a single blank, by folding side panels (5, 18) around a central panel (2) forming the base. Corner panels (24, 25), folded along a diagonal, provide leaktightness with respect to liquids located in the lower part of the container and provide handles (27, 28) which are held and reinforced by flaps (12), provided on the body and on the lid, which are wrapped around the handles. <IMAGE>
