Abstract (en)

[origin: EP0343069A1] Method for washing laundry in a machine, according to which a dispenser and diffuser device of the reusable type is filled with a powdery product, such as a detergent, exerting activity during washing, this device is placed in the machine together with the laundry to be washed, and subsequently the washing is carried out in the usual way. A device (30) used comprises a flexible bag (32), the mouth (31) of which is open for the purpose of filling the bag, being reclosed before it is introduced into the washing machine. The powdery product dissolves progressively into the washing medium and is not in contact with the laundry in solid form. <IMAGE>
