Abstract (en)
[origin: EP0343102A2] A closure cap (1) made of plastic has a guarantee band (5) which engages behind corresponding projections (8) on a container neck (9). The guarantee band (5) is connected to the closure cap (1) by means of tear-off connecting tabs (4). The wall of the guarantee band runs in radially inwardly directed indentations (6), the upper limiting surfaces of which form the engagement edges (10), by means of which the guarantee band engages on the projection (8) on the container neck (9). <IMAGE>
