Abstract (en)
[origin: WO8904885A1] An elastomeric multifilament yarn whose fibrils are not bonded together is made into an elastic bulk yarn with a degree of crimping of at least 40 % and a crimp resistance of at least 50 % by friction texturing. The bulk yarn so obtained is particularly suited to the manufacture of stockings, as well as woven goods, other hosiery and knitted goods, sportswear and outerwear.
