Abstract (en)

[origin: EP0343416A1] In a suspension rail for signs, plates or the like, especially for use as a mounting rail for price signs and as a hanging rail for hooking elements of the suspension rail itself and for holding elements of information displays, the profile of the suspension rail having an essentially double-T-shaped cross-section, the inner sides of the limbs of the crossbar of the T having a catch groove for clipping in signs, and an outwardly open groove being provided on each outer side of the limbs of the crossbar of the T for receiving hooking means having complementary hanging means and holding elements, one of the grooves (44), seen from the groove base, has two additional longitudinally extending U-shaped undercuts (46). By this means, suspension rails of the same type can be placed adjacent to each other or joined together continuously. <IMAGE>
