Abstract (en)

[origin: EP0344549A1] Heating apparatus (15) for a combined clothes washing and drying machine, including a housing (14) removably joined with an opening (13) in the upper part of the wash tub (5) and forming part of the wall of the tub. The heating apparatus (15) is formed by at least one electrical resistance heating element (21) embedded in a mass (23) of heat-radiating material and is provided with means capable of conveying drying air toward the drum (6) containing the clothes.
