Abstract (en)

[origin: EP0344685A2] A laminating machine in a corrugating installation, which is arranged downstream from at least one single-side corrugating machine, and the heating part of which has hot-plates, along which the webs lying on top of one another to be bonded together are guided under the pressure of a pressure means directed towards the hot-plates from above, the heating part being subdivided into at least two sections arranged spaced apart in the operating direction, an application unit being arranged in the interspace between the heating zone sections, and feeding means, assigned to the interspace, being provided for one web below the operating plane of the bonding machine. <IMAGE>
