Abstract (en)

[origin: EP0345103A1] The invention relates to a process and a plant for in-line homogenising and recrystallising metal products obtained by a continuous casting. <??>This process is characterised in that: - a surface cold-drawing (2) is carried out on the product, the product thus cold-drawn at the surface is subjected to a heat treatment (3). <??>The invention applies to processes and plants for in-line homogenisation and recrystallisation of metal products obtained by continuous casting. <IMAGE>
