Abstract (en)

[origin: EP0346315A2] An antenna foot for a movable antenna comprises a dish-shaped holder (1) of magnetizable material and a securing element (2) for an antenna (3) on the top of the holder. In the dish-shaped holder there is placed an annular, permanent magnet (4) secured at a distance from a central magnet yoke (5) and at a distance from the edge of the dish-shaped holder. Permanently secured along the edge of the dish-shaped holder is an encircling protective element (6) of yielding material, preferably in one with the binding material (11) which secures the magnet (4) at a distance from the edge of the holder (1).
