Abstract (en)

The invention relates to the railway industry. Articulated multiple-unit rail vehicle, characterised in that the pivot (8) of the bogey (6) on the wagon body is situated at a certain distance d from the adjacent pivot (4) of the wagon body (2), and not at right angles to the inter-wagon gap (10). The invention makes it possible to give the vehicles forming part of a multiple unit a maximum width for a given structure gauge. <IMAGE>
