Abstract (en)
[origin: US5020821A] PCT No. PCT/FR87/00507 Sec. 371 Date Aug. 14, 1989 Sec. 102(e) Date Aug. 14, 1989 PCT Filed Dec. 17, 1987 PCT Pub. No. WO89/05679 PCT Pub. Date Jun. 29, 1989. The body of a ski has a front portion, a middle portion and a rear portion which are normally aligned longitudinally. The middle portion has a fixing device for securing a boot thereto, and the fixing device is releasable to release the boot from the ski when a predetermined vertical force is exerted upwardly on the boot relative to the middle portion. A front coupling connects the front portion to the middle portion, and a rear coupling connects the rear portion to the middle portion. The couplings are releasable in response to lateral forces which exceed a predetermined magnitude on the respective front and rear portions.

Abstract (fr)
Le ski est divisé en trois parties, une partie antérieure (1), une partie postérieure (3) et une partie médiane (2). La partie médiane (2) comporte des moyens (5, 6) de fixation d'une chaussure (4) avec libération dans le sens vertical en cas d'efforts excessifs. Les trois parties (1, 2, 3) comportent des moyens pour la fixation de la partie antérieure (1) et de la partie postérieure (3) à la partie médiane (2) avec libération dans le sens latéral en cas d'efforts excessifs.
