Abstract (en)
[origin: EP0348602A1] In a burner, especially for a stove, hot-air heating and/or hot-water preparation on yachts, motor caravans, mobile homes, tents or the like, which is connected to a fuel tank via a line, in the line there will be at least one shut-off member (11) for the fuel, which is followed by a nozzle or the like. At the same time, at least one heating device (14) will be connected to the line (7,9,10) in front of the shut-off member (11).
