Abstract (en)  
[origin: EP0349864A2] The method according to the invention for homogenising liquids loaded with solids and for cleaning solid-containing liquid containers achieves, with a control, as a function of the level and operated via a base clock cycle, of the sudden quantity and/or pressure change of a conveying liquid which is directed against the base slope of the container, a high degree of efficiency with low system costs and with energy saving.
