Abstract (en)  
[origin: EP0349943A2] The roller-skating device according to the invention comprises at least two running rollers (16,25) which are attached in a manner permitting free rotation to a rigid rolling chassis (11,21) as a support for the roller-skater's foot and whose running surface is designed to be at least partly spherical, such as the surface of a sphere, a hemisphere, a spherical segment or an ovoid. <IMAGE>
