Abstract (en)

In the position of rest the metering chamber (3) is isolated by closure of the aperture of the chamber seal (4) by an overthickness (13) of the valve stem (7). This aperture is large, and in order for it to be stopped by insertion of the stem (7), the latter carries, within the said metering chamber (3), a stop (18) which, in the position of rest, does not come to bear against the valve seal (5). <IMAGE>

Abstract (fr)

En position de repos, la chambre de dosage 3 est isolée par fermeture de l'orifice du joint de chambre 4 par une surépaisseur 13 de la tige de soupape 7. Cet orifice est de grande dimension, et pour l'obturer par enfoncement de la tige 7, celle-ci porte à l'intérieur de ladite chambre de dosage 3 un obturateur 18, qui en position de repos ne vient pas en appui contre le joint de soupape 5.
