Abstract (en)  
The present invention relates to a separate lubrication type engine and a lubricating oil feeding device comprising an oil pump (25) to supply oil from a lubricating oil container (46) to lubricating oil receiving portions of the engine, wherein said oil pump (25) discharges oil by squeezing a resilient tube (64) by means of a revolving squeezing means (60, 66) in contact with the resilient tube (64) and continuously driven by a drive means (54, 65).
