Abstract (en)

[origin: EP0350886A2] To improve the economic use of a special vehicle equipped with gripper jaws, such as is used in particular for lime sand brick transport, a transport container consisting of two parts, which are interconnected by means of an articulation situated at the top, is envisaged, which is opened and closed by pivoting the two parts in relation to one another, a locking device (6, 7) being designed on the container, which device can be acted upon by means of an operating device (14) arranged on the gripper jaws, which also holds the container in the open position. <IMAGE>
