Abstract (en)

Process for manufacturing bleached CTMP pulps comprising a treatment of the lignocellulosic stock with sulphite at a temperature of at least 100 DEG C under saturated steam pressure, and a bleaching operation with the aid of H2O2 in alkaline medium without removal of solid or liquid matter from the pulp from the start of the treatment until the end of the bleaching.

Abstract (fr)

Procédé de fabrication de pâtes CTMP blanchies comprenant un traitement de la matière lignocellulosique avec le sulfite à température au moins égale à 100°C sous pression de vapeur d'eau saturée, et un blanchiment à l'aide de H2O2 en milieu alcalin, sans élimination de matière solide ou liquide de la pâte depuis le début du traitement jusqu'à la fin du blanchiment.
