Abstract (en)
[origin: EP0351607A2] A washing device for material for washing, in particular for gravel mixed with elutriatable components has a washing shaft (10) which runs in a trough and is equipped with comminuting washing and conveying tools. The tools fit on the periphery of the washing shaft, (10). They extend essentially at a tangent to the washing shaft (10) and enclose with the wall of the trough a wedge angle of less than 90 DEG . Preferably, the tools have a section which becomes clogged with material for washing. <IMAGE>
