Abstract (en)
[origin: EP0351883A2] A glow plug for arrangement in the combustion chamber of an air-compressing internal combustion engine, which is designed as a so-called sheathed-element glow plug, has in the glow bar, connected in series, at least one regulating filament and at least one glow plug filament in the tip of the sheathed-element glow plug, the regulating filament material having a resistance ratio, related to a temperature ratio of 20 DEG /1000 DEG C, of more than approximately 7.5.
