Abstract (en)
[origin: EP0353019A1] This invention relates to a levelling system for a rail, and more particularly relates to a system for levelling rails of the type used in mobile shelving systems or other storage systems. In particular the invention relates to a storage system for fitment to a structure, comprising movable storage units (5) mounted on guide rails (10), wherein the guide rails (10) are attached to the structure by means including a plurality of support units which are independently adjustable to vary the distance between the guide rail (10) and a datum point on the structure.
