Abstract (en)
[origin: EP0353646A2] The invention relates to a passive infrared intrusion detector for monitoring spaces, which can be operated portably, that is to say without a supply cable, from a mains socket or by battery. To this end, the housing is of modular design, the upper housing part containing the infrared detector, the analytical electronics and the alarm, while a first lower housing part contains a power unit and a mains plug and/or a second lower housing part contains a battery chamber and an appropriate power supply unit. <IMAGE>
