Abstract (en)

[origin: EP0353810A2] Process for producing contact pieces from strip material to be pressed onto the insulation-free end of an electric conductor, and contact pieces produced according to the process and punching strips for the production thereof. <??>A number of flat blanks (30) are stamped out of a punching strip (20), which blanks have a first part (31) and a second part (32) and which, after the separation from the punching strip (20), are pressed by means of at least one die to form two different parts of a contact sleeve or a cable lug, the first parts being provided with an insulation, in that they are provided either with an insulation strip (34) which is pushed over one or both side edges (31A, 31B) of each first part (31), or in that the first parts (31) are enclosed in a bag made of insulation material, or are covered with a layer of insulation lacquer, or are provided with a powder burn-in layer. <IMAGE>
