Abstract (en)

[origin: EP0354083A1] Method of treating and packaging articles (1) so as to form an outer-packaged palletised load, comprising a plurality of superposed layers (2) of articles (1), in which there is formed a layer of articles waiting to be stacked; a free pallet (6) is taken, it is transported and is set down in a stacking area (7); an interlayer (8) in sheet form is taken, it is transported and is set down, in the stacking area (7), on the pallet (6) or a lower layer (2) or articles; the layer (2) of articles waiting to be stacked is taken, it is transported and is set down in the stacking area (7) on the waiting interlayer (8); the formation phases are repeated; the load is covered with a tight film of plastic material which is applied to form the outer packaging; each of the layers is surrounded laterally by a supporting member (2) which is formed by a strip of film consisting of flexible plastic material, having a substantial width relative to the height of the articles and capable of producing a substantial tightening of the layer of articles.
