Abstract (en)
[origin: WO8907041A1] A mould bulkhead of the kind which is used in moulds or forms intended for moulding slab-like concrete elements and which are placed and secured transversely or longitudinally of a mould with the aid of fastener devices. The invention is characterized in that the bulkhead (10) includes an aluminium profile (15) which is fitted with a casing profile (16) which is made of a softer, springy material, such as a plastics material, and in that the casing (16) has located on a lower part thereof a downwardly and outwardly extending tongue or lip (17), the top (18) of which, in the absence of load, is located at a lower level than that part (19, 20) of the undersurface of the casing (16) which is intended to lie against the mould bottom.
