Abstract (en)
[origin: EP0355179A1] The invention relates to a linear actuator assembly having a linear motor (2), a control device (22) and a sensor device (31). These three components are combined to form a jointly manipulable working unit. In this arrangement the control device (22) and the sensor device (31) are situated on the control side (28) of the linear motor which is opposite to the working side (18). <IMAGE>
