Abstract (en)

[origin: EP0355322A2] In order to prevent a perception game receiving the character of a game of chance, a set-board (1) is to be produced, in which only spaces (3) which follow one another can be occupied at the same time. The new set-board (1) has a base (2), on which obstacles or barriers such as recesses (5) or elevations are provided, which separate the compactly arranged spaces (3) from one another in such a manner that only spaces which follow one another border one another. Set-board (1) for perception games. <IMAGE>
