Abstract (en)

[origin: EP0356360A1] Assembly equipment for a door on a boiler element made of cast iron, formed from four articulation/flanging assemblies, each consisting of a hinge (1) cast directly en bloc with the said door, of a receiver (11) with two openings (14)(15) and of a boss (20), cast en bloc with the boiler element, of a flange (30) and of a screw (40). The invention is of interest to manufacturers of heating equipment made of cast iron.
