Abstract (en)
[origin: WO8907477A1] Slalom gate, whereby the flag (20) is connected to one of the two gate posts (15, 21, 42) by means of a rubber tensioner (16, 17, 37). When a racer touches the gate post (15) provided with a tilting joint (13), the gate post can be deflected, because the flag is connected to the gate post in question by means of the rubber tensioner.
