Abstract (en)

[origin: EP0356561A1] The dismountable minor-span bridge consists of track carriers (1), which possess a fixed ramp (2) at one end and an articulated ramp (3) at the other end. For bridges of larger span, two track carriers (1) with their ramps (2, 3) are coupled together. The minor-span bridge is laid manually with the aid of a laying harness. <IMAGE>
