Abstract (en)
[origin: EP0356574A2] Self-adhesive label with a suspension loop (1) which is fastened to its adhesive-free surface and made of a flexible film and of which a first region (1A) is firmly connected to the label (2) and a second region (1B) lies loosely upon the label (2). That surface of the suspension loop (1) which is turned towards the label (2) has a continuous adhesive layer which, in the second region (1B), is covered by a non-adhesive layer. As a result, manufacturing is simplified and the mechanical loadability of the suspension loop is increased. <IMAGE>
