Abstract (en)

[origin: EP0356599A1] A casing attached to the plaster for flushing devices with an internal power supply and consisting of a box-like moulding is described. The box-shaped moulding is part of an electronically controlled urinal fixture and consists of a wall-mountable plate (10) which is covered by a covering hood (1). At least one of the side walls of the covering hood is extended by means of a flushing pipe casing (2) which covers the flushing pipe (4) leading to the urinal. The flushing pipe casing (2) is guided in the covering hood (1) so as to be vertically displaceable. <IMAGE>
