Abstract (en)
[origin: EP0356649A2] The invention relates to a comminuting apparatus for medical waste, by means of which the material from a comminuter (3) with an adjoining slide shaft (4) for feeding the comminuted material into the separator (5) is separated into liquids and solids and fed into waste vessels (6.3/6.4) which are sealed by a solder closure. For the purpose of suppressing the generation of dust in the region of comminution, a device (10) is provided for surface treatment. <IMAGE>
