Abstract (en)
[origin: EP0356768A2] In a light metal casting piece, especially die casting piece, having a fastening means arranged in the casting piece, it is proposed, in order to increase the strength of the anchorage of the fastening means in the casting piece, to provide a fibre insert in the casting piece and to arrange the fastening means in a substantially fibre-free zone of the casting material, adjacent to the fibre insert. <IMAGE>
