Abstract (en)
[origin: EP0356802A2] The present invention relates to a process for the production of chromic acid CrO₃, of high purity on the basis of the electrochemical principle, the measures to be taken comprising the process steps: 1. preparation and purification of an aqueous sodium chromate/sodium dichromate solution, 2. conversion of said sodium chromate/sodium dichromate solution into a sodium dichromate/chromic acid solution, 3. crystallisation of chromic acid from said sodium chromate/chromic acid solution by evaporation, 4. separation of the crystallised chromic acid from the mother liquor, 5. recirculation of the separated mother liquor in the centrifuge.
