Abstract (en)
[origin: EP0356852A2] Noise-abating rail, particularly a grooved rail for curves in tramway tracks, which possesses a recess, in the running surface of the rail head, extending centrally in the longitudinal direction of the rail and being filled flush with a non-ferrous metal, and consisting of steel for the remainder of its cross-section, the recess being filled with an anti-friction metal. The anti-friction metal used is preferably a high-lead or high-tin alloy which is known per se.
