Abstract (en)  
[origin: EP0357482A2] An anti-theft device for electrical equipment (1) such as terminals or microcomputers. Cables (6 and 8) connect the equipment (1) to a box which is built-in or surface mounted (3) and contains electronic systems permitting the absence of the passage of current in the cables to be diagnosed particularly following their isolation. The alarm is then given. <IMAGE>
