Abstract (en)

A plastic plate (11, 110) includes a dovetail tenon (112), a dovetail groove (111), a slant tongue (113) and a slant groove (114). The plate (11, 110) can be connected to a similar plate by a dovetail joint and a slant tongue-and-groove engagement. The slant tongue-and-groove engagement can prevent the dovetail tenon (112) from sliding out of the associated dovetail groove (111). A loose-leaf post binder (117 and 118) or an obliquely extending arm (9) is formed between the two interconnected plates.
