Abstract (en)

The reflector lamp has a second wall portion (3), which is internally provided with a metal layer (13), and a third wall portion (4), which adjoins the second wall portion (3) and is light-scattering. According to the invention, the third wall portion (4) has on the inner side an electrostatic powder coating (14), which extends also in an edge zone (7) of the second wall portion. The metal layer (13) also extends in the edge zone (7) on the inner side of the powder coating (14).
