Abstract (en)
The invention relates to an apparatus for a game which comprises a base 1, a plurality of platforms 10 to be placed over the base, and a set of playing pieces for placement on the platforms, wherein the platforms are divided into the subset having a top surface 4 of the same colour, and wherein each platform 10 is slidably connected to the base by a projection 11 which allows its height above the base 1 to be adjusted.
