Abstract (en)
[origin: WO8907024A1] In a process for making moulded parts, into the interior of which a medium is introduced, in particular for making core boxes for core shooting, aeration orifices fitted with nozzles are provided in the mould cavity. When the part or a core arranged in the latter, in particular the core box, is moulded, at least one insert whose shape matches that of the nozzle, is inserted, removed after moulding of the core box and replaced by the nozzle.
