Abstract (en)
[origin: EP0360086A1] The towel dryer has a length of tubing (1) bent in the form of a meander in each of two adjacent vertical planes which are parallel to one another. The lengths of tubing (1) are flowed through by a heating medium. Their straight parts are formed by tubes (2) and their curved parts by tube connections (3). The tubes (2) within the same vertical plane are arranged essentially horizontally at a distance from one another. <IMAGE>
