Abstract (en)
[origin: EP0361028A1] The two compartments of a double-compartment container, in particular of a double-compartment ampoule, are formed by two containers (2, 3) which are arranged side by side and connected detachably to one another and which have a removable closure (7, 10). One container (3) has a neck (8) which forms the introduction and/or removal opening and has a conical outer surface shell (9) which tapers towards the free end of the neck (8). The other container (2) has a neck (5) which forms the introduction and/or removal opening and has an internal cone (6) which is designed to correspond to the outer cone (9) of the other container (3) and which tapers towards the interior of the container (2). <IMAGE>
